Portfolio: raghavtiwariportfolio.vercel.app

Professional Summary

B.Tech Computer Science student focused on building user-centric, AI-powered products and data-driven applications. Experienced in developing LLM-based workflows, RAG pipelines, backend APIs, and interactive visualization tools using Python, FastAPI, and PostgreSQL. Interested in applied AI research, intelligent systems, and scalable software engineering.

Technical & Creative Skills

Programming Languages: Python, C, C++, SQL, JavaScript, HTML, CSS, Java
Frameworks & Libraries: Streamlit, Dash, React, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Technologies & Concepts: Prompt Engineering, Retrieval-Augmented Generation (RAG), LLM, Generative AI, AI Agents, Data Analytics, A/B Testing, Document AI/OCR, Multi-Provider LLM Orchestration (OpenAI, Anthropic, Gemini), Structured LLM Extraction, Risk and Fraud Scoring
Backend: REST APIs, API Integration, Async Processing, JSON, FastAPI
Databases: PostgreSQL, MySQL, VectorDB
Cloud & DevOps: Docker, Docker Compose, Google Cloud Run, Google Cloud Storage, Vercel, Render
Tools: Git, GitHub, Claude, Jira, MS Excel/Google Sheets, Azure Document Intelligence, AWS Textract, Pytest
Methodologies & Professional Skills: Agile, SDLC, Research, Analytical Thinking, Product Roadmaps, Market Research, Competitor Analysis

Professional Experience

Product Research Intern July 2026 – Present

EDMO (iSchoolConnect India Pvt. Ltd.), Noida, India

- Built EDMO's AI Application Evaluator, an admissions platform scoring 15+ applicant document types against program policies; demoed to City Colleges of Chicago, Iowa State University and NU.
- Developed its pipeline with FastAPI, Celery, Redis and PostgreSQL, using Azure OCR and multi-provider LLMs (OpenAI, Anthropic, Gemini) with source-cited, audited decisions.
- Added pre-evaluation risk routing (ID verification, residency, source integrity), integrated with Zoho CRM and NestJS microservices.
- Embedded the Document Intelligence product in Microsoft Dynamics via CHIPS cookies and CSRF/CSP hardening; demoed to University of the People.
- Built and deployed DocTranslator, a layout-preserving AI translation platform, made stateless (PostgreSQL + GCS) to scale on Cloud Run.

Data Management Specialist Intern June 2025 – Jul 2025

Gaurs Group, Ghaziabad, India

- Worked with Excel datasets to clean, organize, and validate data for improved accuracy and consistency.
- Used Python to automate repetitive data processing and reporting tasks, reducing manual effort.

Projects

AquaMind | *FastAPI, PostgreSQL (pgvector), Google Gemini API, Dash* Jul 2025 – Oct 2025
Github: github.com/RaghavTiwari31/AquaMind

- Built a RAG-based platform for natural-language querying of multi-year ARGO oceanographic datasets, defining user stories for intuitive data retrieval.

- Developed FastAPI and PostgreSQL (pgvector) services for semantic search and retrieval.
- Integrated Google Gemini for SQL generation, result summarization, and contextual insights.
- Created interactive geospatial and analytical dashboards using Dash.

Forensiq | *(Winner at RIFT'26) Node.js, Express, React, D3.js, Graph Algorithms* Feb 2026
Github: github.com/RaghavTiwari31/Forensiq

- Built a graph-based financial fraud detection system that identifies suspicious transaction networks, focusing heavily on optimizing investigator user journeys and workflows.
- Implemented graph algorithms to detect circular routing, smurfing, and layered shell structures.
- Developed scalable transaction-processing pipelines for fraud investigation workflows.
- Created interactive D3.js visualizations for exploring financial relationships and risk patterns, directly addressing user feedback and dashboard usability needs.

PUBLICATIONS

- Raghav T., Adithya V., Dr. Nidhi S., Dr. Mudita N. (2025). ***GreenShield – A Natural Language Processing Based Approach to Prevent Greenwashing and Attain Decarbonization***. In Springer Proceedings in Energy, Springer, Singapore. https://doi.org/10.1007/978-981-96-4492-6_6
  - Proposed an NLP-based framework for detecting corporate greenwashing in sustainability reports and advertisements.
- Raghav T., Adithya V., Prachi S., Dr. Deepika B. (2025). ***How GenAI Is Replacing Humans: Myth or Real.* Ethical Considerations in AI: Bias and Fairness in Generative Models**, Taylor & Francis. https://doi.org/10.1201/9781003565703-3
  - Explored the societal and ethical impact of Generative AI on automation, labor, bias, and fairness.

ACHIEVEMENTS

- **1st Place – IndustrySolve 2025 (Ideathon & Productathon), IIIT Delhi:** Secured 1st place in both Ideathon and Productathon rounds among 150+ teams, delivering a fully functional prototype that secured a ₹40,000 award.
- **Rift26-Physics Wallah Institute of Innovation: Secured 1st position** in our problem statement and **ranked 5th overall** among participating teams in a 24-hour national-level hackathon.
- **iQOO x Reskill Hackathon 2026:** Secured **4th Position (Special Honour)** among **80+ teams** in a national-level hackathon organized by iQOO and Reskill, earning a **₹10,000 cash prize**
- **Vibecon, Emergent AI at IIT Delhi**: Built and presented an AI-driven solution during an invite-only 24-hour national hackathon.

EDUCATION

Guru Gobind Singh Indraprastha University New Delhi, India
Bachelor of Technology in Computer Science *Aug 2023 – Aug 2027*
CGPA: *9.77 / 10*
